

**Class : 8**

**Subject : Computer Science**

**SA – I Assignment [2010-21]**

**Q.1 Tick(✓) the correct answers.**

1. Which one of the following is a type of view in MS Access?  
a. Design                      b. Database                      c. Data                      d. Primary
2. You can create a table with your own declaration of data types using  
a. Design view                      b. Datasheet view                      c. Data view                      d. All of these
3. Which of the following is a name for a type of computer that stores data and provides information?  
a. Client                      **b. Server**                      c. Workstation                      d. None of these
4. You can delete a field in  
a. Datasheet view                      **b. Design View**                      c. Both of these                      d. None of these
5. Which of the following is a row in a table?  
a. field                      **b. record**                      c. data                      d. column
6. Which of the following is a data type used to store lengthy text?  
a. Text                      b. Number                      **c. Memo**                      d. Currency
7. Which of the following topologies has all the computers connected to a central computer?  
**a. star**                      b. ring                      c. bus                      d. mesh
8. Which of the following types of network covers the smallest area?  
a. WAN                      b. MAN                      **c. PAN**                      d. LAN
9. The bottom half of the Query Design window is known as the  
**a. Design grid**                      b. Field grid                      c. Task pane                      d. Foreign grid
10. The option to run a query is available on the  
a. Format tab                      **b. Design tab**                      c. Create tab                      d. File tab
11. Which type of network is used to connect computers at various cities in a country  
a. LAN                      **b. MAN**                      c. WAN                      d. PAN
12. Which type of network is a private network that operates within a limited area such as an organization?  
**a. LAN**                      b. MAN                      c. WAN                      d. PAN

13. Which of the following that provides information to a client?
- a. Client                      b. Server                      c. Router                      d. None of these
14. Which of the following is a data type used to store date and time?
- a. Date/Time                      b. Time                      c. Date                      d. Time/Date
15. Which of the following is used to store lengthy text and numbers such as notes?
- a. Text                      b. Memo                      c. Number                      d. all of these
16. Which of the following views is used to create fields and define data types?
- a. Datasheet                      b. Design                      c. Data                      d. All of these
17. Which of the following data types is suitable for Employee Name?
- a. Text                      b. Memo                      c. Number                      d. all of these
18. Which of the following is a field in a table that acts as the primary key of another table?
- a. Foreign key                      b. Report                      c. Query                      d. Form
19. Which of the following option is used to delete the relationship?
- a. Delete                      b. Cut                      c. Remove                      d. Drop
20. Which of the following tags is used to insert an image in a web page?
- a. <image>                      b. <img>                      c. <picture>                      d. <pics>
21. Which of the following attributes of table tag is used to adjust the space between the border and the contents of a cell?
- a. Cellpadding                      b. Cellspacing                      c. Cellborder                      d. None of these
22. Which of the following tags is used to define the title of the table?
- a. <th>                      b. <caption>                      c. <table>                      d. <heading>
23. Which of the following options will you select from the view menu before entering a new record in a form?
- a. Form view                      b. Layout view                      c. Design View                      d. None of these

24. Which of the following are the basic building blocks of a database?

- a. forms                      b. tables                      c. queries                      d. records

**Q.2 Fill in the blanks.**

1. In a query, the Criteria property is used to extract records based on a certain condition.
2. Form is used to enter, edit and display data in an easy-to-understand format.
3. Charles Bachman developed the first DBMS called Integrated Data Store.
4. A modem is a device that converts digital information into analog and vice versa.
5. An example of a Personal Area Network is Bluetooth
6. A router is commonly used to connect different networks.
7. A column in a table is called a field.
8. A database is a collection of data related to a particular subject or purpose, arranged in an organized way.
9. In Bus topology, all the network devices are connected to a single cable called the bus.
10. A MAN covers larger area than a LAN.

**Q.3 Write T for True or F for False.**

1. A client is a computer or electronic device connected to a network. T
2. A computer in a network cannot be attacked by a virus. F
3. A modem is used to connect one network device to another. T
4. A router is used to exchange data across different networks. T
5. A table is the basic building block of a database. T
6. Data is stored and organized in tables in the form of rows and columns. T
7. You can directly enter data in the table in a Design View - F

8. The top half of the Datasheet View is the Field Properties Section - F
9. A Primary key value can never be null - T
10. Deleting field means to rearrange the order of fields. - F
11. The type="A" attribute is used for roman numerals. - F
12. The <img> tag can be used to insert an image in a web page. - T
13. The align attribute is used to specify the size of an image in a web page. F
14. The <td bgcolor> attribute is used to give a background color to an individual cell - T
15. You can use the rowspan and colspan attributes with the <tr> tag. - F

**Q.4 Write the data type you will use for the following.**

1. Employee ID - Number
2. Employee Name - Text
3. Employee Department - Text
4. Date of Joining - Date/Time
5. Location - Text
6. 09-Sep-1984 - date/time
7. \$56.9 - Currency
8. True/False - Yes/No
9. [explorer@gmail.com](mailto:explorer@gmail.com) - Hyperlink

10. 789 - Number

**Q.5 Give an example for each of the following**

1. The Type attribute of an unordered list – type="circle"
2. Attributes of the <td> tag – bgcolor
3. Attributes of the <table> tag – Bordercolor
4. Tags used for creating tables - <table>
5. Empty tags - <img>
