	Combination, Decomposition, Displacement, and Double Displacement reactions. Learning Outcome Ability to balance equations and identify chemical changes in daily life.	Preparing a temporary mount of a leaf peel to show stomata. Learning Outcome Understanding nutrition and respiration mechanisms in plants and humans.	concave mirror & convex lens; tracing path of light through glass slab. Learning Outcome Mastery of ray diagrams, mirror/lens formulas, and human circulatory system.		reaction of acids/bases with metals and carbonates. Learning Outcome Understanding pH scale importance and the manufacturing of bleaching powder/baking soda.	through a prism; properties of metals; reactivity series. Learning Outcome Explaining natural phenomena (rainbows, twinkling stars) and metal extraction	Study properties of acetic acid (ethanoic acid); examining flower parts (Hibiscus). Learning Outcome Calculating power, resistance in circuits, and understanding motors/generators. Understanding Mendelian inheritance and ecological balance (ozone depletion)	Identifying homologous and analogous organs; studying food chains/webs. Ohm's Law verification; plotting magnetic field lines around a bar magnet.
