Chemistry

practical(video)

Year- 2020-21

❖ Volumetric Analysis

Experiment:-

Aim: Prepare M/20 solution of ferrous ammonium sulphate (Mohr's salt). Using this solution find out the molarity and strength of the given KMnO₄ solution.

Experiment:-

Aim: Prepare M/10 solution of oxalic acid. Using this solution, find out strength and normality of the given potassium permanganate solution .

<https://youtu.be/-u3QQPjIlaA>

❖ Qualitative Analysis

Experiment:-

Aim : To analyse the given salt for acidic and basic radicals .

❖ Organic Compounds

Experiment:-

Aim : Identify the functional group present in the given organic compound.
